

# Installing Your StoryWall

The **StoryWall** Company

# Step-by-Step Guide

1

Install the wall cleat. It's important to **make sure the cleat is level**. We provide screws that should be drilled directly into the drywall.

**Tip:** A good rule of thumb is that the midpoint of the panel should be about 60" from the floor. In rooms with ceilings taller than eight feet, the StoryWall can be hung a little higher.

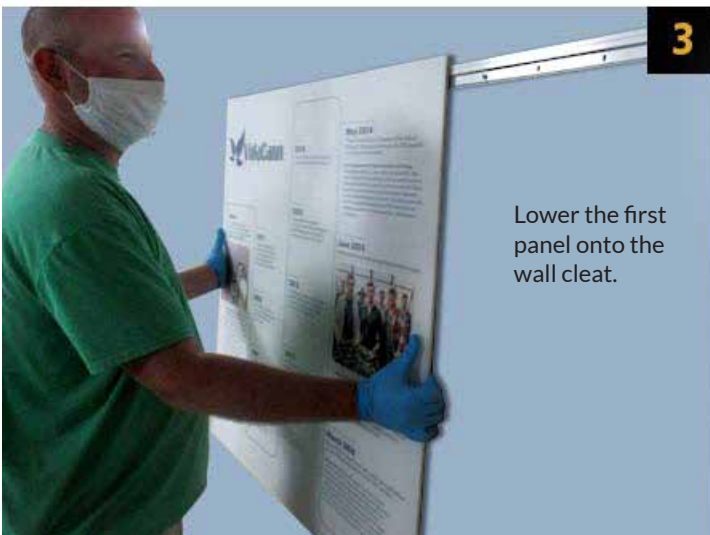

2

Lift the first panel above the wall cleat.

**Tip:** To eliminate fingerprints we suggest that you wear cloth gloves.

3

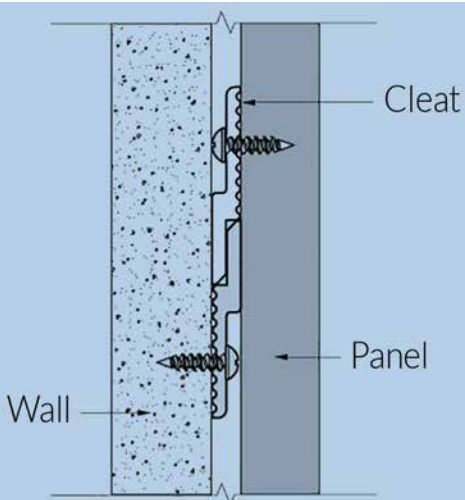

Lower the first panel onto the wall cleat.

4

Then, hang the remaining panels and you're all done!
